# What Is Mental Health?

The [World Health Organization](#) defines mental health as “a state of well-being in which an individual realizes [their] own abilities, can cope with the normal stresses of life, can work productively and is able to make a contribution to [their] community.”

Mental wellness has roots in Judaism dating back centuries. Maimonides' shares in his teachings that the soul and the body are equally as important. He writes, “the soul is subject to health and disease, just as the body...”, acknowledging that health includes both mental and physical components. It almost seems radical that Jewish philosophers were discussing the importance of mental health in the late 1100's and it demonstrates how integral mental health is in Jewish tradition.

**LET'S TALK** about our Mental Health

**What is mental health?**

Mental health is the health of our mind. It affects how we think, how we feel and how we live our lives.

**Mental health is a part of life.**

Just as the world around us affects our mental health, our mental health affects how we react to the world around us.

**Asking for help can help!**

Talking to a friend can help our mental health.

**We all have mental health.**

Everyone experiences mental health differently, but we're all in this together. Let's Talk about it.
